Assembly guide.

NutriBullet® cup assembly.

SEE USER GUIDE FOR DETAILED ASSEMBLY INSTRUCTIONS.

1

Add ingredients* to the NutriBullet® cup.

2

Place the extractor blade onto the cup and twist until it is tightly sealed.

3

Turn the cup upside down and place it onto the motor base, gently push and twist

5

To turn off the NutriBullet® — simply twist in the opposite direction (counterclockwise) and remove cup from base.

6

Once the extractor blade stops completely, remove the cup from the motor base. Enjoy!

CAUTION: Do not run the motor base in excess of 1 minute per interval. Do not run the motor base for more than three 1-minute intervals without allowing it to cool for 2-3 minutes after the third extraction. Running the motor for more than 1 minute consecutively in any interval may warm the ingredients and pressurize the cup.

Friction from the rotating blade when extracting can cause ingredients to heat and generate internal pressure in the sealed vessel. If the vessel is warm to touch, allow to cool before carefully opening pointed away from your body.

Building a smoothie.

Our go-to guide for building a great smoothie, every time. For the best results, add ingredients in the numeric sequence below.

- 1 You must always add liquid before you blend a smoothie.
- 2 Don't overfill your cup. Make sure your ingredients and liquid reach no higher than the MAX line.
- 3 For a cooler, more flavorful smoothie, we recommend using frozen fruit and/or veggies. You can also add ice but not more than 25% of the cup's total volume.*

Our perfected method:

- 1 **GREENS & VEGGIES**
- 2 **FRUIT**
as many varieties as you like
- 3 **NUTS (Optional)**
- 4 **LIQUID**
Never exceed MAX line
- 5 **BOOSTS (Optional)**
- 6 **ICE* (Optional)**
Only up to 25% of your total smoothie ingredients

What is nutrient extraction™?
